

10 Things Junior C++ Devs Don't Get

Lightning Talks
September 28, 2017

Victor Ciura
Technical Lead, Advanced Installer
www.advancedinstaller.com

Math is Important

- Egyptian multiplication ~ **1900-1650 BC**
- Ancient Greek number theory
- Prime numbers
- Euclid's GCD algorithm
- Abstraction in mathematics
- Deriving generic algorithms
- Algebraic structures
- Programming concepts
- Permutation algorithms
- Cryptology (RSA) ~ **1977 AD**

I recommend you start with this book 🙌

Generic Programming

- algorithms are associated with a **set of common properties**

Eg. { `+`, `*`, `min`, `max` } => associative operations
 => reorder operands
 => parallelize + reduction (`std::accumulate`)

- find the most *general* representation of algorithms (**abstraction**)
- exists a **generic algorithm** behind every WHILE or FOR loop
- natural extension of 4,000 years of **mathematics**

"STL and Its Design Principles"
 by **Alexander Stepanov** (2002)

<https://www.youtube.com/watch?v=COuHLky7E2Q>

Books Are Still A Thing

Even slightly older books...

Just two examples:

1976

1986

 Because these books teach the **core** concepts, the fundamentals, which do not change over years.

The Difference Between Efficiency and Performance

Why do we care ?

Because: “Software is getting slower more rapidly than hardware becomes faster.”

“A Plea for Lean Software” - Niklaus Wirth

Efficiency	Performance
the amount of work you need to do	how fast you can do that work
governed by your algorithm	governed by your data structures

Smart Pointers Are Not Panacea

```
std::shared_ptr<T>
```

I'm feeling abused

👋 'nuff said !

Single Responsibility Principle

👉 **We've all seen this class**

Exception Safety

It's not about throwing and catching exceptions !

Basic exception guarantee

Strong exception guarantee

RAII

noexcept

Documentation Matters

Write documentation with the same rigour as you write code.

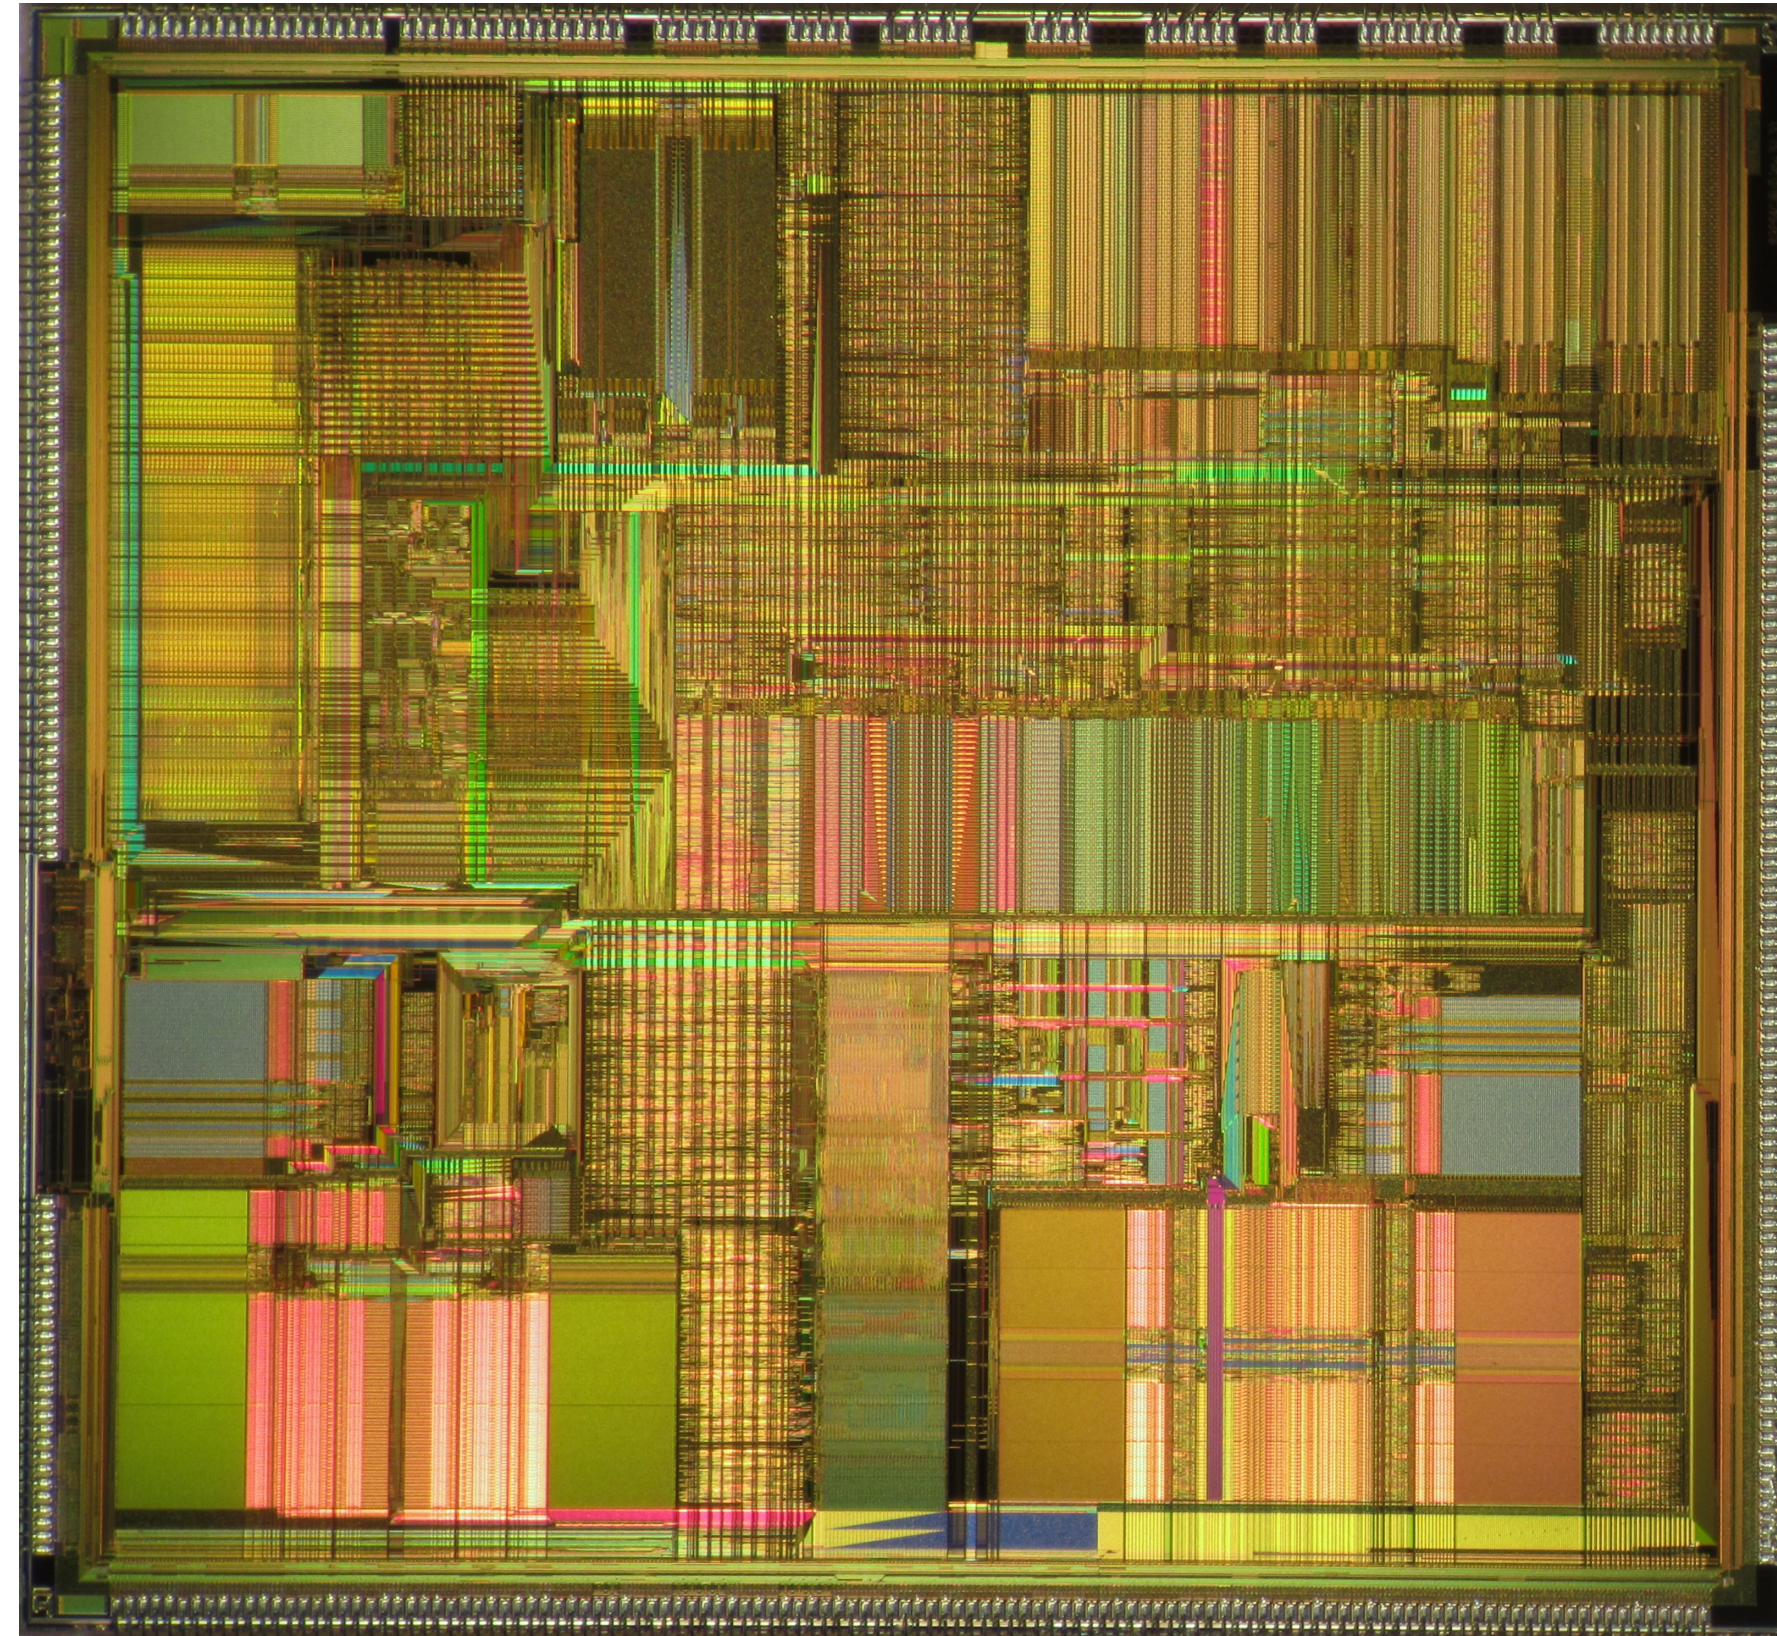

Express your intent/design clearly, in plain good English.

`// this includes your comments`

CppCon 2017 - Lightning Talk about comments, by Walter E. Brown

Computer Architecture

Know the machine you're programming

Attending conferences is not just about the sessions
